

# Overview of Question Types in Brightspace

This will describe the different types of questions used in self-assessments, surveys, and quizzes.

- **True or False Question:**  
True or false (T/F) questions present a statement which respondents must determine is correct or incorrect.
- **Multiple Choice Question:**  
Multiple choice (M/C) questions present a statement or question with a list of possible answers, in which learners must choose the best possible answer.
- **Multi-Select Question:**  
Multi-select (M-S) questions require respondents to identify one or more correct answers in a list of possible answers.
- **Written Response Question:**  
Written response (WR) questions require respondents to write detailed answers in response to open-ended questions.
- **Short Answer Question:**  
Short answer (SA) questions require respondents to create one word or brief sentence answers in response to open-ended questions.
- **Multi-Short Answer Question:**  
Multi-short answer (MSA) questions require respondents to answer a multi-solution question and input their answers into individual input boxes.
- **Fill in the Blanks Question:**  
Fill in the blanks (FIB) questions require respondents to fill in one or more missing words for an incomplete sentence, statement, phrase, list, or key terminology.

➤ **Matching Question:**

Matching (MAT) questions require respondents to choose from a set of possible match choices from drop-down lists and correctly pair them with related items.

➤ **Ordering Question:**

Ordering (ORD) questions require respondents to arrange a series of items into a correct sequence or order.

➤ **Arithmetic Question:**

Arithmetic questions enable you to assess users' knowledge and comprehension of mathematics and number theory.

➤ **Significant Figures:**

Significant figures questions require respondents to answer in scientific notation and provide solutions that contain a specified number of significant figures.
